Advice for Internet Banking Users to Protect Information on the Computer:

- You need to enter your User ID and password to access your internet banking account. Since your access is protected by this password it is a very important point to be remembered that you protect your password, by making it known ONLY to yourself.

- The system prompts you to change the password on first time login, and this is highly recommended that you change the login password on first time login.

- Your password should be at least 6 digit long, it is case sensitive and it should be the combination of alpha and numeric digits.

- Do not use your date of birth, telephone number, address, your name or the name of a friend or relative in your password.

- Your internet banking account will be locked if you enter wrong user id and/or password 3 times.

- Change your password regularly. System will prompt you to change the password after 30 days.

- Ensure that you are not observed by someone else while entering the password.

- Never leave your computer unattended while you are logged in to Internet Banking service of the bank.

- Logoff from Internet Banking service immediately after completion of your session. Use the Logout button for closing the session. It is not recommended to shut the window to log off.

- Disable the option on browsers for storing user names and passwords.
